Summary

I am 2nd-year Btech Computer Science Student at Punjabi University Patiala. I know C++, SQL and I am trying to develop problem-solving skills by doing DSA competitive programming. I am interested in Cloud computing and VR technology but I need more practical knowledge.

I am passionate about coding and how to apply it in real life scenerio. I want to have some skills like team working skills, problem solving skills, communication skills for the future time. So I am seeking internship opportunities for industry practical knowledge with the real life applied projects to work with the team and get certificates for resume.

I basically want to become a cloud engineer as my dream job.
